## Overview

### Purpose of this document

These release notes for Learning Environment 8.3.0 MR3 are intended only as an overview of product enhancements included in this release. For detailed information about changes to permissions and DOME settings, see the *Roles and Permissions* guide and the *Desire2Learn Organization Management Environment (DOME) Guide*. For information about using new features added in this release, see the guides listed in the *Related Documentation* section, below.

### Related documentation

All guides are available in the Documentation Library on the Desire2Learn Community website: <http://community.desire2learn.com>. (Enrollment in the Desire2Learn Community is required to access this site. Information about enrollment can be found on the Community login page.)

---

## System requirements

For complete information on system and browser requirements for Learning Environment 8.3.0 MR3 see the *Desire2Learn Platform Requirements* document.

---

## Issues fixed in this release

Tool	Issue #	Description
Accessibility	40724, 40715, 40718, 40719, 40720, 40723, 41539	Some form fields are missing descriptive labels.
Bulk Course Export	41121	Exporting quiz questions that contain images that were inserted from older versions of the Learning Environment may cause an error.

Tool	Issue #	Description
Classlist	40985	The Alt tab in Classlist displays all roles in an organization unit and is not tied to "Display users enrolled as this role in Classlist."
Classlist	41235	Users with roles that do not have the "Display users enrolled as this role in Classlist" permission cannot be added as a participant.
Content	40893	French accents do not display properly in downloaded Content topics.
Content	41247	The frame names in View Content are insufficiently descriptive.
Discussions	34721	Shared forums and topics are visible in child Org Units but they are not visible in the assigned Org Unit.
Discussions	39703	While replying to a discussion post, clicking "Add Original Message Text" inserts the original message text and overwrites any existing text.
Email	41528	Filtering an address book by section or group may cause a timeout error if the section or group contains more than 200 users.
Email	33210	If a user receives an email with only internal email addresses in the BCC field, moving the message to the Draft folder causes the BCC addresses to be visible.
Email	41482	Sending or deleting email messages with the d2l.Tools.Mail.StorageSpace variable enabled causes an error.
Grades	41373	Bold, italic and underline formatting in Grade Item comments display as HTML code.
Grades	41660	If you change the display options for User List to display a grade item and then delete the grade item, an error occurs when attempting to view the User List.
Grades	40065	The CSV file created as part of the Export Grades process may not display properly in Excel without saving it first and then opening the file using the Excel Text Import Wizard.
Grades	41320	Users with roles that do not have the "Show this role in the list of users that can be graded" permission still appear in the Grades export file.

Tool	Issue #	Description
Homepages	40861	A collapsed semester or department view in the My Courses widget does not retain after logging out of the Learning Environment.
Homepages	41904	Custom widgets that contain JavaScript do not execute as expected.
Homepages	40979	The Updates widget does not display the total number of broken links.
Homepages	40901	Users with roles that do not have the "Manage Widgets" permission are able to change the display options for the Events and Calendar widgets. Changes to the display options are applied to the entire Org Unit rather than the applicable user.
HTML Editor	41327	The variable to control direct HTML source editing is configurable at the Org level rather than the Role-Org level.
Manage Courses	40905	Users are unable to create courses with a start date later than December 31, 2008. Selecting a 2009 start date from the calendar view causes an error.
Manage Users	41108	User role names do not always display as expected.
Quizzes	33590	Importing quizzes that contain random sections sometimes causes an error.
Roles and Permissions	40969	The label for the permission "Override learner achievement for Competencies, Learning Objectives, and Activities" is incorrect.
Rubrics	41354	Clicking a QuickLink in a Rubric level description from the Submit File page in Dropbox, the Submission page in Quizzes and the View Activities page in Grades causes an error.
Self Registration	24524	The Enrolment Limit email only references the organization and does not specify the Org Unit for which the enrolment limit has been reached.
User Profile	41090	The User Profile picture only displays at the Org level.
Widgets	40730	If a user does not have access to any tools in an Org Unit, the instructions for User Progress are not applicable.
